

Bilfinger is a leading provider of industrial services throughout Switzerland. We provide our customers with tailor-made engineering and services throughout the entire lifecycle of an industrial plant.

from consulting and engineering to production, assembly and insulation, right through to comprehensive maintenance concepts and implementing them. We demonstrate the highest levels of safety and quality. Our services are divided into five business areas: Maintenance, Engineering, Pipe & Plant Engineering, Insulation Technology and Safety Training & Service.

You as our customers should be able to focus on what you do best - your core business

At Bilfinger we are constantly focused on our customers individual requirements. We have the means and the skills to offer precise, custom-fit solutions for a wide range of specifications. To do so, we rely on the diversity of our skill set.

BILFINGER INDUSTRIAL SERVICES SCHWEIZ AG

PIPE & PLANT ENGINEERING

We offer the highest quality individual tailor-made solutions which always achieve the highest technological standards. Bilfinger is able to ensure efficient, flexible work processes based on the extensive prefabrication of pipelines and components in our own workshops. We efficiently deliver project planning and installations using the latest CAD technology, expertise and entrepreneurial thinking.

MAINTENANCE

We boost plant efficiency, guarantee high availability and reduce maintenance costs. Our maintenance portfolio covers the entire value chain, from consulting, engineering, manufacturing, assembly, maintenance, plant expansion and general plant revision to environmental technology and digital applications.

SAFETY TRAININGS

Targeted courses for companies and individual participants in the areas of skylifters, personal protective equipment to prevent against falls, and forklifts. Our training offerings are distinguished by their high level of practical relevance based on realistic training situations. We are recognised nationally and internationally by Certification by SafetyWorks and IPAF.

INSULATION TECHNOLOGY

Professional insulation solutions for energy generation, waste incineration, supply systems, chemical plants and other industrial plants. We supply innovation in insulation from less-than-zero to the highest range of temperatures. We help you cut energy costs and contribute to environmental protection using the best possible insulation. Optimal insulation also ensures a healthy climate indoors and improves the quality of working conditions.

ENGINEERING

Our services cover the entire planning chain of basic, detailed and software engineering, support, both for commissioning and lifecycle services, right up to dismantling. We provide support and full service, from planning and organisation to implementation and commissioning.

SAFETY SERVICES

The Bilfinger Service Center combines customer service and efficiency. We inspect systems, hose lines, pressure valves and work devices, repair them where necessary and then approve them for continued use. Our professional experts are certified by several bodies and work flexibly and efficiently on customer sites.
